

## 50" Black Android Freestanding Digital Poster

**Save 13%** Original price ~~£2,298.00~~ Current price **£1,999.00** Excl. VAT

Feature	Description
<b>24/7 Commercial Grade</b>	Designed for continuous use in public spaces, with commercial-grade LCD panels, LED backlights, and no external buttons or controls.
<b>IPS Panel</b>	450cd/m <sup>2</sup> commercial-grade IPS panel for incredible image quality and color accuracy from an ultra-wide viewing angle in portrait orientation.
<b>Eco Power Timer</b>	The eco-friendly power timer allows for scheduled on/off times, improving environmental efficiency.
<b>Scheduling Software</b>	Free scheduling software for displaying different content at different times of the day, or update the screen directly.
<b>Internal Locker</b>	Lockable compartment in the rear of the display with space for a small PC or media player, powered from inside the locker with no need for additional power cables.
<b>Integrated Castors</b>	Lightweight design with integrated castors and recessed rear handles for easy manoeuvrability, and retractable feet for more permanent installations.
<b>Built-In Speakers</b>	Two integrated slimline speakers for added audio element to your digital signage solution.

## 50" Digital Signage Commercial Display Monitor

**IPS Panel** The IPS panel delivers superior image quality and color depth at a brightness of 450cd/m<sup>2</sup> and a wide viewing angle of 178° in both landscape and portrait orientations.

**24/7 Usage** - Commercial Grade Designed with commercial-grade panels and components, these displays are built to operate 24/7 in constant use, providing reliable performance compared to domestic screens and other professional monitors that are designed for only 16 hours a day, 7 days a week. The panel also has a lifespan of over 70,000 hours of continuous use.

**Narrow Bezel** The narrow bezel design helps draw attention to the screen's images, making messaging more impactful. These monitors can also be used as part of a budget-friendly video wall.

**Built-in Media Player** In addition to AV inputs, these displays have a built-in HD media player, allowing you to run content directly from a USB drive. Simply load your pictures and videos onto a USB memory stick, insert it into the display, and the screen will play the content in a continuous loop. This feature makes it easy to create dynamic digital signage without the need for additional hardware.

**Built-in Speakers** The displays have two integrated slimline speakers for applications that involve an audio element.

**Eco Friendly Power Timer** The eco-friendly power timer allows you to assign daily or weekly on and off times for your screen. The ability to power on and off automatically means that the screen is only in use when it needs to be; improving your environmental efficiency.

**LED Backlight Technology** Thanks to their LED backlight, these displays offer improved brightness and contrast, as well as drastically improving their lifespan and reducing their power consumption. Unlike other forms of light, this technology is mercury-free, making it even more eco-friendly.

**Smart Temperature Control System** The internal air-conditioning system allows the screens to be in constant use. A fanless cooling system keeps their panels and other internal components at the optimum working temperature, ensuring a long and reliable life for your screens.
