Subject: Re: Witney Summer Mental Health Drop-ins Update

Hi Adam,

We had another really successful summer with drop in's, seeing on average 3 different families every week. This has led to further intervention with a family who are completely disengaged from education, we have continued to support for EHCP/ EHNA for the young person and working to support a specific suitable placement. We are also supporting Mum who has come from an abusive relationship to not only deal with her own trauma as well as supporting the young person.

[redacted] lso provided on the spot immediate therapeutic support for another family who have also gone on to attend our weekly parent support sessions.

We have also had load of really positive feedback from sofa in the street which we were really thankful to have been able to do outside of the Corn Exchange; we have formed therapeutic relationships with a number of the families that attended, working to support one family who need full support including supporting housing applications and interventions with their young person. Another family who have been regularly attending WeGame monthly and they also attended all of the Summer Sessions - forming a really lovely relationship with [redacted] our Youth Worker - and I am working with Mum to support the young person who struggles in school and has to be on a reduced timetable and will probably need a specialist provision moving in to KS2.

As an update from us as an organisation - we have also had investment from WODC which has enabled us to train two youth workers with Oxfordshire Youth, as well as Digital Youth Work with NYA. We are also undertaking training to Sanctuary Seekers. Migrants and Unaccompanied Minors, which starts this week.

Again apologies for the delay!
