

Schemes to support local climate initiatives

Dec 2020

The following schemes are currently available to local communities to support their own goals on climate:

- [OxFutures](#) offers free energy audits for businesses to identify energy-saving opportunities, to reduce energy bills and cut carbon emissions
- [Rural communities energy fund](#) supports rural communities wanting to carry out feasibility on renewable energy projects in their area
- [Cosy Homes Oxfordshire](#), one delivery partner supporting the UK government's [Green Homes Grant](#) scheme, offering homeowners and landlords vouchers which cover two-thirds of the cost of undertaking certain energy efficiency retrofit improvements, up to £5,000. Please note high demand in the scheme is causing delays.
- Advice and toolkits to plan local action such as the [Ashden Climate Toolkit](#) or [Bioregional's One Planet Living Framework](#).
- Advice on moving away from fossil fuels to [electric vehicles](#) or information on [EV and Charging in Oxfordshire](#).
