540- 1 WTC/174/21 Plot Ref :-21/02929/FUL Type :- FULL  
Applicant Name :- . Date Received :- 20/09/21  
Location :- LAND AT WINDRUSH PARK Date Returned :- 13/10/21  
WINDRUSH PARK ROAD  
Proposal : Erection of 2 industrial units (Use Class E(g)iii, B2 and B8), to include external ancillary service areas, car and cycle parking.  
Observations : Witney Town Council object to this application.

The plans do not go far enough to show where the cycle paths link to existing networks, or show how and where the paths cross the site. In line with Policy T1, All new development should be designed to maximise opportunities for walking, cycling and the use of public transport. The current scheme is unambitious, in that more can be done to provide opportunities for walking and cycling. Further, Policy T3 states that Development that fails to make adequate provision of measures to encourage the use of non-car modes of transport will not be favourably considered.

Witney Town Council echo the views of the Local Lead Flood Authority and request that SuDS features be incorporated whenever possible, such as porous paving in the car park. Similarly, members agree with the submission from Thames Valley Police and prior to this application being approved, request further details of the boundary treatments and lighting at the site.

Whilst Witney Town Council object to the current proposal, development of the site is supported and members welcome revised plans with consideration of the points raised above. This is also an opportunity for the applicant to incorporate sustainable features such as Solar PV and vehicle charging points, in line with Core Objectives CO15, CO17 and CO18 of the West Oxfordshire Local Plan 2031.

ST  
HIGH STREET  
Proposal : Construction of dwelling and detached outbuilding comprising garaging and

garden shed with storage above.

Observations : Witney Town Council object to this application. The Flood Risk Assessment states that the application site is at high risk of river flooding, with no flood defences in situ. Even with proposed mitigation measures, the flood risk assessment concludes that overall flood risk to the development itself is medium.

Further, the assessment indicates that development may have an adverse impact on local flood risk. Witney Town Council object to the proposal on the grounds that flood risk is increased for nearby properties - This area has been badly affected by river flooding and surface water flooding as recently as December 2020.

In line with Policy T1, All new development should be designed to maximise opportunities for walking, cycling and the use of public transport. The current proposal is lacking in cycle storage and Members encourage more safe cycle parking and storage to provide for the proposed number of residents.
