

edibleFowey
at Plantation Gardens

This garden was designed as a food forest. As well as being ornamental, all of the plants in this scheme are edible and are planted following the principles of edible forest gardening.

This method of gardening makes use of the beneficial relationships between perennial plants, placing them together using vertical as well as horizontal space like a forest ecosystem.

The garden is a habitat for insects, providing nectar for bees and other pollinators. It grows sustainable and organic food for us year after year, without the need to dig or re-plant.

edibleFowey is a registered charity. For more information on our projects and how you can help, please contact us on 01752 810000 or visit our website www.ediblefowey.com

The plot is owned by the Fowey Town Council.
