

Officers are set to visit the town this week to draw up signing plans based upon the work done by the working group we attended.

At the present time the cabinet member decisions date is set for April 2022 which is later than we had hoped but from a staff resource perspective we have been unable to move any faster.

The county will still be covering all of the costs as part of the pilots.

As soon as the design is drawn up we will be coming back to the steering group to check that all is ok before the report is written for the amendments.
